

1. (Currently amended) A portable personal communications and cosmetics apparatus comprising a base unit having two laterally opposed side walls, each with a plurality of cavities therein for receiving removable cosmetics products and a separate mobile phone unit mounted on the base unit.

2. (Original) An apparatus according to claim 1, in which said mobile phone unit is detachably mounted on the base unit.

3. (Original) An apparatus according to claim 2, further comprising a top unit for carrying further cosmetics products.

4. (Previously amended) An apparatus according to claim 3, in which the top unit is detachably mountable on either the base unit or the mobile phone unit.

5. (Original) An apparatus according to claim 2, including a fascia device detachably mountable on the mobile phone unit when the latter is detached from the base unit.

6. (Canceled)

7. (Currently amended) A portable personal communications and cosmetics apparatus comprising a base unit, a cosmetics carrier for cosmetics products comprising a tray slidable in the base unit carried by the base unit and movable relative thereto between an open position for accessing the cosmetics products and a closed position, and a separate mobile phone unit mounted on the base unit, said base unit having two laterally opposed side walls, each with a plurality of cavities therein for receiving further removable cosmetic products.

8. (Canceled)

9. (Previously presented) An apparatus according to claim 1 further comprising a top unit for carrying further cosmetics products.

10. (Previously presented) A portable personal communications and cosmetics apparatus according to claim 1 wherein said base unit side walls have a given depth, said base unit having a width greater than the width of said mobile phone unit, a length greater than the length of said mobile phone unit, and a tray for receiving the cosmetics products slidably mounted in said base, said tray having a depth less than said given depth, one of said cavities slidably receiving said tray, and other of said cavities adapted to receive individual cosmetic products.

11. (Previously presented) A portable personal communications and cosmetics apparatus according to claim 1, including selected cosmetic products having screw-threaded packages, selected ones of said cavities being screw-threaded complementary to said screw-threaded packages.

12. (Currently amended) A portable personal communications and cosmetics apparatus comprising a case, and a separate ~~a~~ mobile phone unit non-detachably mounted in ~~a said case~~, said case having a back coextensive in length and width with said unit, said apparatus having a recess separating the phone unit from the back of the case, and a cosmetics carrier for cosmetics products comprising a tray slidable in the hollow recess of the case and movable relative thereto between an open position for accessing the cosmetics products and a closed position, said case having two laterally opposed side walls, each with a plurality of cavities therein for receiving futher removable cosmetic products.

13. (Previously presented) A portable personal communications and cosmetics apparatus according to claim 12, including a plurality of cavities in said case, and selected cosmetic products having screw-threaded packages, selected ones of said cavities being screw-threaded complementary to said screw-threaded packages.

14. (New) A portable personal communications and cosmetics apparatus according to claim 12, wherein two of said cavities in one of said laterally opposed side walls are identical to two of said cavities in the opposite laterally opposed side wall.

15 (New) A portable personal communications and cosmetics apparatus according to claim 1, wherein two of said cavities in one of said laterally opposed side walls are identical to two of said cavities in the opposite laterally opposed side wall.

16 (New) A portable personal communications and cosmetics apparatus according to claim 7, wherein two of said cavities in one of said laterally opposed side walls are identical to two of said cavities in the opposite laterally opposed side wall.
